

Public Health Bulletin. 26th July 2016

Produced by NHS libraries in Thames Valley and Wessex

Please find below a list of news items from the past fortnight that may be of interest to those involved in public health. This Bulletin provides topical news and reports of relevance to public health teams, community health practitioners and anyone with an interest in health promotion. All content and links are provided for information only and we do not sponsor, endorse or otherwise approve of any mentioned website or the contents of the news items. Please refer to the terms and conditions of the relevant website should you wish to reproduce any of the information.

Details of alternative current awareness services which cover more academic/specialist sources of information can be found in the section *Other Bulletins*. Your local NHS library service can assist you in accessing other current awareness services/tailored alerts, locating peer reviewed journal articles and answer any other queries you may have regarding finding information.

The information about each news item only gives a brief overview so we recommend you view the original source by clicking on the title (or Ctrl+Click in the word document).

Please contact your local NHS library service if you no longer wish to receive this Bulletin, or if you know of anyone else who would like to join the mailing list. The Bulletins are also available on the Thames Valley Public Health Network at: <http://www.oxsph.org/bulletins.html> and the Wessex Public Health Network at: <http://www.wessexphnetwork.org.uk/resources/public-health-updates.aspx>

Alcohol misuse

PAHO Meeting on Alcohol Marketing Regulation: Final Report

Tues 12th July 2016

Source: UK Health Forum:

<http://www.ukhealthforum.org.uk/>

An exploratory meeting on regulation of marketing of alcohol products was held at the Pan American Health Organization in WDC, 12-13 January 2015. The objectives of the meeting were to summarize the research on the effects of alcohol marketing on young people; review existing statutory and self-regulatory codes on marketing and examine their effectiveness; and describe the experience of countries where alcohol marketing legislation has been recently enacted or proposed.

Black and ethnic minority groups

FGM is child abuse, says UN Population Fund chief

Fri 15th July 2016

Source: BBC: <http://bbc.co.uk>

The head of the United Nations Population Fund has, for the first time, described female genital mutilation as "child abuse".

Racism leads to poorer health and wellbeing for children

Tues 12th July 2016

Source: Economic and Social Research

Council: <http://www.esrc.ac.uk/>

Children's health and development is adversely affected by racism, says recent research from the ESRC International Centre for Lifecourse Studies. "There's now a compelling body of evidence linking racism with poorer health and development in children, something which has long-term implications for their wellbeing," says Professor Yvonne Kelly.

The first ever FGM figures show nearly 6,000 new cases in England

Thurs 21st July 2016

Source: BBC: <http://bbc.co.uk>

The first ever recorded figures for female genital mutilation (FGM) show that between April 2015 and March 2016 there were 5,702 new cases in England. The data was recorded by doctors and nurses who have been obliged to do so since July 2015. Most of the women and girls were born in Africa and underwent the procedure there. But 43 girls were born in the UK and 18 of those had it done here.

LGA and Barnardo's respond to new FGM figures

Thurs 21st July 2016

Source: Local Government Association:

<http://www.local.gov.uk/>

In response to new annual statistics released today by the Health and Social Care Information Centre (HSCIC) about the number of identified cases of FGM in England from April 2015 to March 2016, Councillor Lisa Brett, FGM spokesperson for the Local Government Association, said: "While these figures show new cases of FGM recorded, the FGM Centre's pioneering pilot project is also providing a more detailed picture of how many women and girls are at risk, adding to the information on total numbers available from the NHS, so support can be better targeted going forward."

Chronic conditions

State of the Nation 2016 (England): Time to take control of diabetes

Mon 18th July 2016

Source: UK Health Forum:

<http://www.ukhealthforum.org.uk/>

This report has been published by Diabetes UK, it brings together evidence from recent national diabetes audit reports covering care processes and treatment targets, inpatient care, pregnancy and foot care.

LGA responds to new Diabetes UK report

Wed 13th July 2016

Source: Local Government Association:

<http://www.local.gov.uk/>

Responding to a new Diabetes UK report, Cllr Izzi Seccombe, the Local Government Association's Portfolio Holder for Community and Wellbeing, said: "The figures are alarming and confirm that diabetes is one of the fastest growing health challenges facing the United Kingdom today."

Children and young people with suspected diabetes should be seen by a specialist immediately, says NICE quality standard

Thurs 14th July 2016

Source: National Institute for Health and Care

Excellence (NICE): <http://www.nice.org.uk>

When a GP suspects a child or young person has diabetes, they should immediately be sent to hospital and seen the same day by a specialist, a new NICE quality standard says.

New guidelines on diabetes in children admirable - but need adequate resourcing, says College

Thurs 14th July 2016

Source: Royal College of General

Practitioners: <http://www.rcgp.org.uk/>

RCGP Diabetes Lead, Dr Stephen Lawrence, has responded to new NICE guidance on diabetes in children and young people. He said: "The aspirations from NICE are admirable, and a welcome addition to existing guidance - particularly for type 1 diabetes, having our patients that we suspect of having diabetes in front of a specialist within 24 hours is something that the College has called for.... however, it is essential that general practice, and onwards services, are resourced sufficiently in order for the new NICE recommendations to become a reality."

The DIY diabetes kit that's keeping us alive

Thurs 14th July 2016

Source: BBC: <http://bbc.co.uk>

Meet the growing number of type 1 diabetics who are building their own unapproved, open source monitoring systems.

Be Clear on Cancer respiratory symptoms campaign launches

Thurs 14th July 2016

Source: Public Health England:

<https://www.gov.uk/government/organisations/public-health-england>

First national Be Clear on Cancer campaign to raise awareness of symptoms of lung cancer, lung disease and heart disease begins.

Simpler ovarian cancer testing 'saves lives'

Wed 13th July 2016

Source: BBC: <http://bbc.co.uk>

Simplifying the way ovarian cancers are tested saves both lives and money, a study suggests.

'Secret ginger gene' may increase skin cancer risk for millions

Wed 13th July 2016

Source: NHS Choices: <http://www.nhs.uk/news/>

"People can carry a 'silent' red hair gene that raises their risk of sun-related skin cancer, experts warn," BBC News reports. Research suggests that carrying just one copy of a variant of the MC1R gene (having two copies causes red hair) increases skin cancer risk, even for people without red hair.

Treat sepsis 'the same as heart attacks'

Wed 13th July 2016

Source: BBC: <http://bbc.co.uk>

Suspected sepsis in patients must be treated as an emergency in the same way as heart attacks are, says NICE (National Institute for Health and Care Excellence).

Diagnosis of sepsis a worry for GPs so support to help early identification is welcome, says RCGP

Tues 12th July 2016

Source: Royal College of General Practitioners:

<http://www.rcgp.org.uk/>

Chair of the RCGP, Dr Maureen Baker, has responded to new guidelines by NICE on sepsis published today. She said: "The diagnosis of sepsis is a huge worry for GPs as initial symptoms can be similar to common viral illnesses so we welcome any guidance or support to help us identify it as early as possible. Sepsis is one of the College's Spotlight projects until April 2017."

'Nine out of 10 strokes preventable,' claims study

Mon 18th July 2016

Source: NHS Choices: <http://www.nhs.uk/news/>

"Nine out of 10 strokes preventable if people follow 10 health rules," The Daily Telegraph reports. The news comes from a large study that found the top 10 risk factors for stroke are preventable.

Measles vaccination advice for young adults

Fri 15th July 2016

Source: Public Health England:

<https://www.gov.uk/government/organisations/public-health-england>

Measles cases continue to be confirmed in teenagers and young adults across England. Public Health England (PHE) is advising young adults to ensure they have received 2 doses of MMR vaccine.

Communicable diseases

Spain registers first Zika microcephaly birth in Europe

Mon 25th July 2016

Source: BBC: <http://bbc.co.uk>

A woman in Spain infected with the Zika virus has given birth to a baby with the brain disease microcephaly, thought to be the first such birth in Europe.

Unusual US Zika virus case baffles experts

Tues 19th July 2016

Source: BBC: <http://bbc.co.uk>

Experts are trying to work out exactly how a US carer has caught Zika after tending to a dying elderly man with the virus.

Zika virus epidemic to last 'another three years'

Fri 15th July 2016

Source: NHS Choices: <http://www.nhs.uk/news/>

"Zika epidemic to last another three years as 'too late' to control it, say researchers," reports the Telegraph Online. A team of researchers at Imperial College London aimed to explore the dynamics of the current Zika epidemic in Latin America and used this data to calculate the potential future spread of the virus.

'Anti-vaccination mafia'

Sat 16th July 2016

Source: BBC: <http://bbc.co.uk>

A doctor's social media post about the preventable death of a child highlights concerns about anti-vaccination campaigning in India.

Meningitis B vaccine extension rejected

Wed 13th July 2016

Source: BBC: <http://bbc.co.uk>

Health campaigners say they are "hugely dismayed" that the meningitis B vaccine will not be extended to all children in the UK under the age of two.

Diet & nutrition

'Wash salad' advice after two die from E. coli

Mon 18th July 2016

Source: BBC: <http://bbc.co.uk>

Shoppers are being reminded to thoroughly wash mixed salad leaves amid concern that this food could be the source of an E. coli outbreak that has killed two and infected more than 150 people in the UK.

Update as E. coli O157 investigation continues

Thurs 21st July 2016

Source: Public Health England:

<https://www.gov.uk/government/organisations/public-health-england>

Public Health England (PHE) is continuing to investigate an outbreak of E. coli O157, which appears to be associated with eating mixed salad leaves.

UK Health Forum Response to Committee on Advertising Practice consultation on non-broadcast advertising of food and soft drink to children

Fri 22nd July 2016

Source: UK Health Forum:

<http://www.ukhealthforum.org.uk/>

"We are pleased that the Committee of Advertising Practice (CAP) has accepted the need to take action, and to harmonise the rules across all forms of media, using the current restrictions on TV advertising as a starting point. However, it is our view that this consultation is not at the same level of commitment as the bold action we saw earlier this year with the Government's announcement of a sugary drinks levy. CAP has missed obvious opportunities to build on the leadership the UK has shown by introducing the Ofcom restrictions on TV advertising of unhealthy food by putting the protection of children's health above food and advertising industry profits in other media."

PHE publishes new advice on vitamin D

Thurs 21st July 2016

Source: Public Health England:

<https://www.gov.uk/government/organisations/public-health-england>

Public Health England (PHE) is advising that 10 micrograms of vitamin D are needed daily to help keep healthy bones, teeth and muscles.

Eating oily fish 'may boost bowel cancer survival'

Fri 22nd July 2016

Source: NHS Choices: <http://www.nhs.uk/news/>

"Oily fish may reduce risk of death from bowel cancer, study suggests," reports The Telegraph. US research found people with bowel cancer who increased their intake of oily fish after diagnosis were less likely to die from the condition.

Getting to grips with our food waste

Wed 20th July 2016

Source: Economic and Social Research

Council: <http://www.esrc.ac.uk/>

The UK's food waste problem is galvanising agreement between retailers, policymakers, NGOs, activists, campaigners and consultants, says research from the Sustainable Consumption Institute (SCI) at the University of Manchester.

Disability

New National Commissioning Framework for Hearing Loss Services launched

Tues 19th July 2016

Source: NHS England:

<http://www.england.nhs.uk>

A new guide to help organisations responsible for planning and commissioning local hearing services for deaf people and those with diminishing hearing is launched by NHS England today.

Drug Misuse

CQC's annual report on controlled drugs

Thurs 14th July 2016

Source: Care Quality Commission:

<http://www.cqc.org.uk/>

Our report for 2015, published today, highlights local and national initiatives to promote the safe use of controlled drugs and to reduce harm from their misuse.

Environmental health

Fracking linked to asthma flare-ups

Tues 19th July 2016

Source: BBC: <http://bbc.co.uk>

Fracking, the controversial method for mining natural gas, might trigger asthma flare-ups, according to a US study.

Keep cool and carry on

Tues 19th July 2016

Source: Public Health England:

<https://www.gov.uk/government/organisations/public-health-england>

PHE is urging people to take care and have fun in the heatwave, while making sure that support is given to those who may be at risk from the ill effects of heat.

Health promotion

Be healthy be mobile: Annual report

Thurs 21st July 2016

Source: UK Health Forum:

<http://www.ukhealthforum.org.uk/>

The Be He@lthy, Be Mobile initiative saw tremendous progress in 2015, with more countries launching their national programs, new content areas under development, and an increase in country demand for mHealth services.

Health protection

Simpler ovarian cancer testing 'saves lives'

Wed 13th July 2016

Source: BBC: <http://bbc.co.uk>

Simplifying the way ovarian cancers are tested saves both lives and money, a study suggests.

A healthier life for all

Mon 18th July 2016

Source: UK Health Forum:

<http://www.ukhealthforum.org.uk/>

The Health Foundation and the All-Party Parliamentary Health Group have jointly published a comprehensive, accessible collection of essays setting out the current and emerging threats to health and wellbeing and what we know about what works to address them.

Health services administration

NHS investigation 'failed' over boy's sepsis death

Tues 19th July 2016

Source: BBC: <http://bbc.co.uk>

The NHS 'failed' to properly investigate how health service blunders led to the death of a boy from sepsis, a report finds.

Academies warn Brexit 'damaging science'

Tues 19th July 2016

Source: BBC: <http://bbc.co.uk>

An open letter to the government from UK academies representing science, medicine and engineering warns that Brexit is already harming science.

Health budget rise 'less than was promised'

Tues 19th July 2016

Source: BBC: <http://bbc.co.uk>

Ministers in England have given the wrong impression about how much extra they are spending on health, MPs say.

Community pharmacies braced for cuts announcement

Fri 15th July 2016

Source: BBC: <http://bbc.co.uk>

A decision about whether to cut £170m from the budget for community pharmacies in England is expected soon.

Council tax rises 'fail to stop care cuts'

Wed 13th July 2016

Source: BBC: <http://bbc.co.uk>

Care services run by councils are facing major cuts this year as rises in council tax have failed to plug the gaps in budgets in England, town hall chiefs are warning.

CQC inspectors highlight outstanding and good care as reports are published on 80 more GP practices

Mon 18th July 2016

Source: Care Quality Commission:

<http://www.cqc.org.uk/>

In the past week, CQC has published a further 80 reports on the quality of care provided by GP practices that have been inspected by specialist teams of inspectors. The total number of practices rated Outstanding is now 169. The total number of practices that have exited Special Measures is now 49.

Research on GPs working at scale encouraging, but more needed to assess long term benefits, says RCGP

Mon 18th July 2016

Source: Royal College of General Practitioners:

<http://www.rcgp.org.uk/>

Dr Maureen Baker, chair of the RCGP, responds to a new Nuffield Trust report on large scale general practice. She said: "Our population is growing and ageing and as a result patients are living longer, often with multiple, chronic conditions. GPs and our teams are seeing more patients than ever before and developing new methods of working, including large-scale GP organisations, such as federations of practices, is one way to help ensure that general practice can cope with this growing demand."

Cornerstone of NHS reforms faces uncertain future

Tuesday 12th July 2016

Source: The King's Fund:

<http://www.kingsfund.org.uk/>

Clinical commissioning groups (CCGs) have secured better engagement from GPs than previous forms of commissioning but still face numerous barriers to putting power in doctors' hands, according to [a new report](#) published by The King's Fund and the Nuffield Trust.

Impact of the Spending Review on health and social care

Tues 19th July 2016

Source: UK Health Forum:

<http://www.ukhealthforum.org.uk/>

The House of Commons select committee have published a report on the Impact of the Spending Review on health and social care. The scale of the funding challenge is colossal, especially given the timescale for achieving it.

Care should be based on assessed need says LGO

Wed 20th July 2016

Source: Local Government Ombudsman:

<http://www.lgo.org.uk/>

Councils are being asked to ensure that their care provision is determined by an individual assessment of needs, even in times of financial pressure. This is in response to a Local Government Ombudsman investigation which revealed a council's attempts to make blanket reductions to the support it gave to vulnerable people without first assessing their needs.

NHS targets 'ghost' patients who don't go to the GP

Wed 20th July 2016

Source: BBC: <http://bbc.co.uk>

Patients in England who have not been to see their GP for five years face being deregistered as the NHS prepares to get tough on "ghost patients". NHS England said new rules would be brought in next month and see patients removed from GP lists unless they responded to warning letters.

HIV & AIDS

Are young South Africans ignoring Aids message?

Mon 18th July 2016

Source: BBC: <http://bbc.co.uk>

Aids remains the biggest cause of death among young people in Africa and the number of lives lost in this group has tripled in the past 16 years.

Court to hear HIV Prep drug challenge

Wed 13th July 2016

Source: BBC: <http://bbc.co.uk>

A judicial review into an NHS decision not to fund a "game-changing" drug that can prevent HIV will be heard in the High Court on Wednesday.

Infected blood payment scheme reformed

Wed 13th July 2016

Source: Department of Health:

<https://www.gov.uk/government/organisations/department-of-health>

All infected individuals will now receive annual payment including extra £500 winter fuel payment without the need to apply for it.

Mental health

Scans reveal how teenage brain develops

25th July 2016

Source: BBC: <http://bbc.co.uk>

Brain scans on 300 teenagers done by scientists at Cambridge University revealed that the areas associated with complex thought processes change most during the teenage years. A link was discovered between brain development and mental illness, such as schizophrenia. This affords the "...opportunity to try to identify individuals that are at risk of becoming schizophrenic in the foreseeable future, the next two to three years, and perhaps to offer some treatment then that could be helpful in preventing the onset of clinical symptoms. "

Thousands to benefit from kick-start of mental health services transformation

Tues 19th July 2016

Source: NHS England:

<http://www.england.nhs.uk>

Thousands of children and adults of all ages with conditions such as psychosis, depression and anxiety will be among the first to benefit from improved services as work starts on a major transformation programme for mental health care.

Increased mental health services for those arrested

Wed 13th July 2016

Source: Department of Health:

<https://www.gov.uk/government/organisations/department-of-health>

An extra £12 million will be spent over the next 2 years to expand services that make mental health assessments available to those arrested.

Best start in life Promoting good emotional wellbeing and mental health for children and young people

Wed 13th July 2016

Source: UK Health Forum:

<http://www.ukhealthforum.org.uk/>

The Local Government Association (LGA), has published a briefing which highlights examples of councils that are looking at innovative ways to provide support with a focus on children and families rather than static services, as well as more information about the scale of the problem and what steps can be taken.

Obesity

Obesity 'now a leading cause of death; especially in men'

Thurs 14th July 2016

Source: NHS Choices: <http://www.nhs.uk/news/>

"Being overweight or obese puts men at a greater risk of dying prematurely than women," BBC News reports. A survey of global trends found obesity was now second only to smoking as a cause of premature death in Europe.

Obesity to cost councils half a billion

Mon 18th July 2016

Source: Local Government Association:

<http://www.local.gov.uk/>

The fight against obesity is set to have cost councils more than half a billion pounds since taking over public health from the NHS three years ago.

Building the foundations: tackling obesity through planning and development

Tues 19th July 2016

Source: UK Health Forum:

<http://www.ukhealthforum.org.uk/>

Obesity is a complex problem that requires action from individuals and society across multiple sectors. This Local Government Association (LGA) report builds on the learning and knowledge included in the TCPA's 2014 document 'Planning healthy-weight environments'.

Oral health

CQC inspectors publish reports on 33 dental practices in England

Mon 18th July 2016

Source: Care Quality Commission:

<http://www.cqc.org.uk/>

The Care Quality Commission published reports on the quality of care provided by 33 dental practices in England last week.

Physical activity

Can you get the benefits of exercise by having a hot bath?

Tues 12th July 2016

Source: BBC: <http://bbc.co.uk>

Having a hot bath or a sauna is a good way to soothe your limbs after exercise, but what happens if you do it instead of exercise?

'Walk or cycle to work to lose weight' says study

Tues 19th July 2016

Source: NHS Choices: <http://www.nhs.uk/news/>

"Pedalling the pounds away: Why cycling could be the best way to lose weight," says The Daily Telegraph, reporting on a UK study comparing how different methods of commuting affected obesity levels. People who cycled to work typically had a lower body mass index (BMI) and body fat than their walking counterparts, according to the study by the London School of Hygiene and Tropical Medicine.

Guidance: Health matters: getting every adult active every day

Tues 19th July 2016

Source: UK Health Forum:

<http://www.ukhealthforum.org.uk/>

Increasing physical activity has the potential to improve the physical and mental health and wellbeing of individuals, families, communities and the nation as a whole. Public Health England (PHE) wants to see more people being physically active. This professional resource sets out how to achieve this.

Safety & accident prevention

Ombudsman calls for culture change in how NHS investigates avoidable deaths

Tues 19th July 2016

Source: Parliamentary and Health Service

Ombudsman: <http://www.ombudsman.org.uk>

A report published today calls for a no-blame culture in which leaders and staff in every NHS organisation feel confident to openly investigate complaints, in order to learn from them and improve patient safety.

CQC review of how NHS trusts investigate and learn from deaths

Fri 15th July 2016

Source: Care Quality Commission:

<http://www.cqc.org.uk/>

We're looking at how NHS acute, community healthcare and mental health trusts investigate deaths and learn from their investigations. We also want to assess whether opportunities to prevent deaths have been missed.

Smoking

Smokers who try to quit 'drink less alcohol', too

Mon 25th July 2016

Source: NHS Choices: Behind the Headlines:

<http://www.nhs.uk/News/Pages/NewsIndex.aspx>

Those quitting smoking may also lower alcohol consumption and there may be benefits for the liver. The news follows an analysis of two ongoing studies that aimed to investigate whether people who attempt to stop smoking are more likely than other smokers to report lowering their alcohol consumption.

Social & economic issues

Patients to wait more than one week to see GP on 100m occasions by 2020 - endangering the health of thousands of patients

Sat 23rd July 2016

Source: Royal College of General Practitioners

<http://www.rcgp.org.uk/common-elements/rss/rss-news-feed.aspx>

New analysis published today by the Royal College of GPs show that, if recent trends continue, the number of occasions when patients will have to wait longer than a week to see their GP will increase by more than 28m occasions from 2015/16, when patients had to wait to see a GP on just over 69m occasions, to 98m in 2020/21. The analysis also indicates that by 2020/21 waiting times will be so bad that patients will be unable to get an appointment with their GP at all on 52m occasions.

In response, the College is calling for government promises of increased investment and an expansion in general practice staff numbers, outlined in NHS England's GP Forward View, to be implemented as a matter of urgency in order to avoid this and ensure patient safety.

New findings reveal NHS initiative to get vulnerable people online has dramatically improved their health and well being and reduced demand for front line services

Tues 19th July 2016

Source: NHS England:

<http://www.england.nhs.uk>

A report published yesterday shows an NHS programme to train vulnerable people to use the internet has led to over half feeling more confident to manage their health, 21% making fewer calls or visits to their GP and 6% making fewer trips to A&E. This behaviour change is estimated to have saved the NHS £6 million in avoided GP and A&E visits in just 12 months.

Closing the health gap – a gap worth closing: How housing can play its part in reducing health inequalities

Wed 13th July 2016

Source: UK Health Forum:

<http://www.ukhealthforum.org.uk/>

This Housing LIN Practice Briefing equips housing, care and support practitioners, and public health teams, with ideas about practical actions they can take to reduce health inequalities.

Women's health

Raw eggs 'safe for pregnant women'

Mon 25th July 2016

Source: BBC: <http://www.bbc.co.uk/news/>

The Advisory Committee on the Microbiological Safety of Food said that the risk of salmonella from UK eggs produced to **Lion code** or equivalent standards should be considered "very low", and therefore it was not necessary to advise pregnant women or the elderly to avoid eating eggs. The advice applies only to eggs produced in the UK to this standard. The Food Safety Commission is launching an eight week consultation to respond to the claims.

New blood test for pregnant women could help thousands avoid unnecessary treatment

Thurs 14th July 2016

Source: National Institute for Health and Care Excellence (NICE): <http://www.nice.org.uk>

NICE is recommending a new test in pregnancy that could mean up to 40,000 women could avoid unnecessary medicines. The test analyses the baby's DNA found in its mother's bloodstream to establish what blood group it is – if it's different to that of its mother it can cause serious complications.

The Americans who 'adopt' other people's embryos

Mon 18th July 2016

Source: BBC: <http://bbc.co.uk>

More and more couples in the US are using donated embryos to have a child of their own - and many say they are motivated to 'adopt' by religious and ethical beliefs.

Edinburgh baby born from frozen ovary in UK first

Thurs 14th July 2016

Source: BBC: <http://bbc.co.uk>

A cancer patient from Edinburgh becomes the first UK woman to give birth following a transplant of her frozen ovary tissue.

Over 40s 'have more babies' than under 20s

Wed 13th July 2016

Source: BBC: <http://bbc.co.uk>

Women in their forties are having more babies than women two decades younger for the first time in nearly 70 years, official figures for England and Wales show.
